

Hotel Booking Analytics Dashboard

Insights & Recommendations

Final Insights

- The hotel business recorded strong booking demand with approximately 85K total bookings, indicating healthy market activity and customer interest.
 - A high cancellation rate of 27.19% resulted in nearly 23K canceled bookings, creating significant revenue leakage and occupancy uncertainty.
 - Customers with longer lead times showed a much higher probability of cancellation, especially beyond 150–200 days.
 - Most cancellations originated from “No Deposit” reservations, proving that customers without financial commitment are more likely to cancel.
 - City Hotels experienced considerably higher cancellation volumes compared to Resort Hotels.
 - Online Travel Agencies (OTA) generated the largest share of bookings and revenue, making them the dominant distribution channel.
 - Average Daily Rate (ADR) increased steadily from 91 in 2015 to 112 in 2017, indicating improving pricing power and growing customer willingness to pay.
 - Revenue trends revealed strong seasonal demand fluctuations, creating opportunities for dynamic pricing optimization.
 - Room Type A contributed the highest revenue share, making it the most important inventory category.
 - Guests with more special requests consistently generated higher ADR values, indicating that personalized service customers are more profitable.
 - Repeat guest percentage remained very low at only 3.92%, highlighting weak customer retention performance.
 - Corporate customers demonstrated lower cancellation behavior compared to transient and OTA-based customers.
 - Longer stay durations were relatively uncommon, with most bookings concentrated in short stays.

Final Recommendations

- Implement predictive analytics models to identify high-risk cancellations before arrival dates.
- Introduce deposit-based and partial prepayment policies for long lead-time and high-risk bookings.
- Apply dynamic pricing strategies based on seasonality, occupancy trends, and booking demand patterns.
- Increase room pricing during peak demand periods to maximize Average Daily Rate and revenue performance.
- Reduce dependency on OTA channels by promoting direct bookings through loyalty programs and exclusive offers.
- Develop targeted customer retention campaigns to improve repeat guest percentages.
- Introduce personalized promotions and premium service packages for high-value guests with special requests.
- Prioritize inventory allocation and upselling strategies for high-performing room categories such as Room Type A.
- Strengthen customer communication through automated reminders and booking confirmation workflows.
- Use customer segmentation analysis to create differentiated pricing and marketing strategies for leisure, corporate, and group travelers.
- Improve occupancy forecasting using lead-time and seasonal demand analysis.

- Focus on converting transient customers into loyal repeat guests through reward programs and personalized engagement.
- Optimize operational planning during high-demand seasons using historical booking and revenue trends.
- Continuously monitor cancellation behavior and pricing performance to support long-term revenue management decisions.
